

Based on award-winning software, with the ability to have onsite and offsite components, both solutions offer the backup management features that businesses need and enterprise toughness that global technology leaders demand. They provide continuous cloud backup protection, along with backup archive verification, plus alerting and reporting features to keep you in the know about the status of your backup.

CORE BENEFITS

- ONSITE/OFFSITE COMPONENTS.
- MONITORED BY PROFESSIONALS.
- REPORTING & ALERT FEATURES.
- ROUTINE TESTING OF BACKUPS.

Managed Data Backup Solutions

your business needs

PROTECT YOUR DATA

Our Data Backup services securely backs up your company's data with both an onsite and offsite components. Such a backup protects your vital information from being destroyed by fire, hackers, vandalism, human error, etc. In addition, our process includes regularly testing the usability of the backed-up data. Many providers miss this step, only for their client to discover that their backed-up data is corrupted or inaccessible when they need it.

CUSTOM SOLUTIONS

Our flexible data backup architecture makes it easy to leverage your existing infrastructure for private data backup to the cloud. This is the cornerstone of our disaster recovery and business continuity initiatives.

CONTINUITY SOLUTIONS

Managed Data Backups are designed to eliminate risk, improve security and help manage your technology so you and your employees can focus on your business. With Managed Data Backup solutions from West Wind Technology Solutions, we can monitor, manage and test your data backups, providing security and confidence that your business's data will always be safe and available.
